1. INTRODUCTION

CRYPTONIUM coin is secretive, decentralized shared cryptographic money, in view of CRYPTONIUM coin Note innovation that offers protection and swappiness of exchanges. Our digital CRYPTONIUM coin currency is future coin, since it depends on the most recent innovation and made by the best building group. Your assets are secured in light of the decentralization of our cryptographic money. With us, you are your own particular bank, it's not

possible for anyone to see the measure of the exchange and the ID of the sender and the beneficiary, which means it is 100% mysterious coin. Installments are distributed on an open blockchain, however all data stay private. We utilize progressed cryptographic strategies, which ensure the precision of exchanges without divulgence extra data. Our coin permits quick, free from charges exchanges from everywhere throughout the world. CRYPTONIUM coin has no hardcoded most extreme blocksize, which implies that dissimilar to BTC it doesn't have a 1 MB square size breaking point counteracting scaling.

CRYPTONIUM coin Note innovation was made by our building group and is continually moving forward. SN is like CN however has a considerable measure of additional items. SN is an application layer convention that forces heaps of decentralized protection centered advanced monetary standards.

2. VISION

Technology is rapidly growing and diversifying. As it does, more and more businesses are using technology to facilitate their transactions. Many of the most prominent commercial entities, such as Amazon, eBay, Alibaba, Lazada, etc. have achieved their success through e-commerce development. E-commerce was established in 1979 and has been evolving

vigorously up to this point in time. It thrives on the development of the internet, smartphones, and online shopping demands.

To make transactions more convenient and seamless, developers have created new payment solutions, such as PayPal, Alipay, Visa, Mastercard, etc., which has provided users a better online shopping experience.

The transparency provided by blockchain technology, paired with Bitcoin smart contracts are new advances which will help e-commerce grow in an entirely new way. Combining blockchain technology with e-commerce will enhance the efficiency of business, increase the income for the seller, and reduce the cost to the buyer.

According to Statista report (<https://www.statista.com/topics/871/online-shopping/>) in 2016 alone, global e-retail sales amounted to 1.9 trillion. All of these companies need a payment solution, and the companies that are providing those solutions are also thriving.

There are many ways in which blockchain technology can be used to improve the existing payment solutions. *For instance*, there is virtually meagre cost of currency exchange. We are minimizing the fee of every transaction, limiting it to nearly zero.

3. CRYPTO CURRENCY OF TOMORROW

Our digital currency was made for what's to come. We utilize the most elevated innovation to make CRYPTONIUM coin based on e-commerce arranged for future. Namelessness, uniqueness, security, protection and quick exchanges without expenses making our coin the best arranged in the digital currency showcase.

4. MINING

CRYPTONIUM coin, as Bitcoin, utilizes Verification of-Work strategy, while the Cryptonium calculation, as opposed to SCRYPT, takes into account exceptionally viable burrowing with ASIC.

Test reaction conventions expect a direct intelligent connection between the requester (customer) and the supplier (server). The supplier picks a test, say a thing in a set with a property, the requester finds the important reaction in the set, which is sent back and checked by the supplier. As the test is picked on the spot by the supplier, its trouble can be adjusted to its present load. The work on the requester side might be limited if the test reaction convention has a known arrangement (picked by the supplier), or is known to exist inside a limited hunt space.

Pools and Hardware

The principal path to mine CRYPTONIUM coin is to join a pool, however mining solo is additionally conceivable and upheld. The rundown of trusted CRYPTONIUM coin pools will be accessible soon on our site. Many individuals likewise need to utilize specific mining equipment so as to expand their mining hash rate – it is bolstered by us also..

5. WHY ARE WE BETTER THAN OTHERS

We are superior to different mysterious digital forms of money, since we Utilize another innovation, made by our designing group. CRYPTONIUM coin has the best potential in the digital money showcase.

6. BEST PLATFORM FOR DEVELOPERS

Our stage will permit designers to make an applications utilizing Java and Python, each application will have claim blockchain associated with the principle Blockchain CRYPTONIUM coin. Angular js , Node js, Python and Java. These programming dialects are presently extremely famous and have an awesome future and therefore, CRYPTONIUM coin moreover. For the improvement of decentralized applications, CRYPTONIUM coin utilizes an

unexpected approach in comparison to the ones proposed by contenders. Each enlisted application has its own condition. It's design is proportionate to the engineer

of the application. It relies upon what number of hubs the conveyed framework will be, or the calculation that the hubs get by agreement. CRYPTONIUM coin is the second particular digital money. On account of the decentralized application stage, new highlights can be actualized rapidly and effectively, with decentralized application, for example, decentralized voting, personalities, client names, confided in frameworks, informal organizations, memory modules, sharing economies and some more. All design subtle elements will be accessible simply after the official arrival of CRYPTONIUM coin .

7. PREPARED FOR WAR WITH NON CO-OPERATIVE GOVERNMENTAL AGENCIES

CRYPTONIUM coin is set up for battle with the administrations, which need to boycott digital money. The most recent couple of months have demonstrated us that nations are separated on the cryptographic money.

Some of them need to boycott cryptographic money exchanging, similar to China. CRYPTONIUM coin was made with a view to flexibility, anybody on

the planet ought to have the capacity to utilize our coin. Legislators need to boycott Bitcoin and different coins since it isn't in their business. Our coin is mysterious so no one can know who the sender is and who the beneficiary is. Exchanges are with 0% charge and their speed is 2s. We offer protection and security, with us you are your own bank. CRYPTONIUM coin digital money trade that we need to open will be enlisted in prominent exchanger and ready for everybody on the planet. Here, in Singapore there are no charges and controls so this place allows us to continually create and ensure that the legislature won't begin to battle with cryptographic forms of money. Just you are in charge of your own assets and just you work them. These days, banks have control over your cash and they can do all that they need. We should quit giving the chance to touch our cash. We are rolling out CRYPTONIUM coin to improve this.

We trust, that the most astounding innovation and the best group will carry out the activity.
